

## **Event schedule for 2010 at Honeycomb Farm include:**

### **"Sustainable Beekeeping - A More Natural Approach"**

A complete look inside the hive as it pertains to hive dynamics and approaches to non-chemical treatments. Very informative and entertaining. A great beginners course for new beekeepers & experienced beekeepers alike! Focused on alternatives to chemical treatments, through management and equipment options (IPM). Main topics include, understanding mites cycles, alternative treatments, comb management and strategies, and understanding the bee's natural life cycle. This is part classroom, and part hands-on in a bee yard.

**Date: July 15, 2010 (Saturday)**

**Time: 9 am. to 5 pm.**

Call or email for class outline and info. 717-938-0444

### **"Disease Diagnosis, and Independent Inspectors Course"**

Designed for complete disease inspecting and county level support programs. A proactive approach to self monitoring and club mentoring/inspection programs. Covers all inspection procedures for field diagnosis. Hands on instruction.

**Date : May 22, 2010 (Saturday)**

**Time: 9 am. To 5 pm.**

Call or email for class outline and info 717-938-0444

### **"Queen Rearing and a Quality Mating Program"**

This class covers all aspects of a quality queen rearing operation, beneficial to both large and small operations. Topics include genetic selection, drone yard setup, grafting and non-grafting procedures, with hands on instruction. Very popular, instructional, and fun! Contact us for more info. 717-938-0444
